

**DESK INTERCOM  
SL-1002**

The award winning design of the Marc II desktop intercom stations features a four-digit LCD display, four LED indicators, volume control, a keypad with ten digit keys and eight function keys. The LCD display indicates the number dialed, the number of the terminal that left a call request, the number of your terminal, the number to which incoming calls are transferred, any messages that are stored in the station and the current time. It also has a volume control on the station. The desktop stations are designed for hands-free communication between the user's station and any other station in the system.
